Canon Camera WIA Driver 5.0.5 for Windows Me/XP

Supported Cameras:

PowerShot A100, PowerShot A200, PowerShot G3, PowerShot S45, DIGITAL IXUS 330,
DIGITAL IXUS v², DIGITAL IXUS v³

The change made in this software:

In the previous version of the WIA driver, when image in the camera is transferred via "Scanner and Camera" window or Explorer, the edge of the bottom line of the image is slightly lost very rarely. This issue is fixed in the new release of "Canon Camera WIA Driver 5.0.5".

Notes:

If WIA driver 5.0.5 is installed, you need to use the RemoteCapture with version 2.7 or higher. The Updated version of RemoteCapture is available from product support page in Canon Europe web site:
