Cleaning the Video Heads

Digital video camcorders record video signals on the tape in very thin lines (as thin as 1/8 of the width of a hair). The following symptoms may appear if the video heads become dirty even a little.

- Mosaic or other blocky video artifacts (Fig. 1) or banding (Fig. 2) appear on the picture during playback.
- Sound becomes distorted, or there is no sound during playback.
- The message “HEADS DIRTY, USE CLEANING CASSETTE” appears.

If such symptoms appear, clean the video heads with the Canon DVM-CL Digital Video Head Cleaning Cassette* or a commercially available dry cleaning cassette.

* Availability differs from area to area.

Video heads may become dirty under the following conditions:
- When using the camcorder in humid or hot places.
- When using cassettes with damaged or dirty tape.
- When using the camcorder in dusty places.
- When using the video heads without cleaning them for a long time.

NOTES
- Before you make important recordings, clean the video heads and make a test recording first. We also recommend cleaning the video heads after use, before storing the camcorder.
- Do not use wet type cleaning cassettes as this may damage the camcorder.
- Even after cleaning the video heads you may not be able to play back correctly tapes that were recorded with dirty video heads.
Important Usage Instructions

WARNING!
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

WARNING!
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK AND TO REDUCE ANNOYING INTERFERENCE, USE THE RECOMMENDED ACCESSORIES ONLY.

CAUTION:
DISCONNECT THE MAINS PLUG FROM THE SUPPLY SOCKET WHEN NOT IN USE.

The Mains plug is used as the disconnect device. The Mains plug shall remain readily operable to disconnect the plug in case of an accident.

While using the compact power adapter, do not wrap it or cover it with a piece of cloth, and do not place it in confined narrow spaces. Heat may build up, the plastic case may deform and it could result in electric shock or fire.

CA-590E identification plate is located on the bottom.

Using any device other than the Compact Power Adapter CA-590E may damage the camcorder.

European Union (and EEA) only.
This symbol indicates that this product is not to be disposed of with your household waste, according to the WEEE Directive (2002/96/EC) and your national law. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit www.canon-europe.com/environment.  
(EEA: Norway, Iceland and Liechtenstein)

About the Joystick and the Joystick Guide

The mini joystick allows you to control many of the camcorder’s operations and to make selections and changes in the camcorder’s menus.

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Push the joystick up, down, left or right (.vn, .vn)</td>
<td>to select an item or change settings.</td>
</tr>
<tr>
<td>Press the joystick itself (.)</td>
<td>to save the settings or confirm an action. On menu screens, this is indicated by the joystick icon  .</td>
</tr>
</tbody>
</table>
The functions assigned to the joystick change according to the operation mode. You can display the joystick guide to remind you of the joystick’s functions in each operating mode.

**About the Operating Modes**

The camcorder’s operating mode is determined by the position of the **POWER** switch. In the manual, indicates that a function is available in the operating mode shown and indicates that the function is not available. When no operating mode icons are given, the function is available in all operating modes.

13 **Tape operation**

15 **Remaining tape**
 Indicates the remaining time of the tape in minutes. “ ” moves during recording. When the tape reaches its end, the display changes to “END”.
- When the time left is less than 15 seconds, the remaining tape time may not appear.
- Depending on the type of tape, the remaining time displayed may not be correct. In any case, you will be able to record on the tape the number of minutes that appears on the videocassette’s label (for example, 85 minutes).

16 **Remaining battery charge**

- When “ ” starts flashing in red replace the battery pack with a fully charged one.
- When you attach an empty battery pack, the power may turn off without displaying “”.
- Depending on the conditions under which the camcorder and the battery pack are used, the actual battery charge may not be indicated accurately.

20 **Backup battery warning**
 flashes in red when the lithium button battery is not installed, or when it needs to be replaced.

22 **Recording reminder**
The camcorder counts from 1 to 10 seconds when you start recording. This is helpful to avoid scenes that are too short.
Getting Started

Charging the Battery Pack

The camcorder can be powered with a battery pack or directly using the compact power adapter. Charge the battery pack before use.

1. Turn off the camcorder.
2. Attach the battery pack to the camcorder.
   • Press the battery pack lightly and slide it down until it clicks.
3. Connect the power cord to the compact power adapter.
4. Plug the power cord into a power outlet.

Charging, Recording and Playback Times

The times given in the table below are approximate and vary depending on the actual charging, recording or playback conditions.

</tbody>
</table>

* Approximate times for recording with repeated operations such as start/stop, zooming, power on/off.
5 Connect the compact power adapter to the camcorder’s DC IN terminal.
   - The CHARGE indicator starts flashing. The indicator will stay on when the charging is completed.
   - You can also use the compact power adapter without attaching a battery pack.
   - When the compact power adapter is connected, even if a battery is attached its power will not be consumed.

**ONCE THE BATTERY IS FULLY CHARGED**

1 Disconnect the compact power adapter from the camcorder.
2 Unplug the power cord from the power outlet and the compact power adapter.

**TO REMOVE THE BATTERY PACK**

Press [BATT.] to release the battery pack. Lift the battery pack and then pull it out.

**IMPORTANT**

- You may hear some noise from the compact power adapter during use. This is not a malfunction.
- We recommend charging the battery pack in temperatures between 10 °C and 30 °C. Outside the temperature range of 0 °C to 40 °C, the charging will not start.
- Do not connect to the camcorder’s DC IN terminal or to the compact power adapter any electrical equipment that is not expressly recommended for use with this camcorder.
- To prevent equipment breakdowns and excessive heating, do not connect the supplied compact power adapter to voltage converters for overseas travels or special power sources such as those on aircraft and ships, DC-AC inverters, etc.

**NOTES**

- The CHARGE indicator also serves as a rough estimate of the battery charge status.
  - Continuously on: Battery fully charged.
  - Flashes approx. twice per second: Battery over 50% charged.
  - Flashes approx. once per second: Battery less than 50% charged.
- The charging time will vary depending on the surrounding temperature and the battery pack’s initial charge condition. In cold places, the effective usage time of the battery will decrease.
- We recommend that you prepare battery packs 2 to 3 times longer than you think you might need.

**Installing the Backup Battery**

The backup battery (lithium button battery CR1616) allows the camcorder to retain the date, time (19) and other camcorder settings while the power source is disconnected. Connect a power source to the camcorder when replacing the backup battery to retain the settings.
1 If a battery pack is attached, remove it first.
2 Open the backup battery cover.
3 Insert the backup battery with the + side facing out.
4 Close the cover.

**NOTES**
The backup battery has a life span of about a year. \(\Rightarrow\) flashes in red to inform you that it needs to be replaced.

---

**Inserting and Removing a Tape**
Use only videocassettes marked with the \(\text{M} \text{Y} \text{M} \text{Y}\) logo.

1 Slide \(\text{OPEN/EJECT} \Rightarrow\) fully in the direction of the arrow and open the cassette compartment cover. The cassette compartment opens automatically.
2 Insert the cassette.
   - Insert the cassette with the window facing the grip belt.
   - To remove a cassette pull it straight out.
3 Press the \(\text{PUSH} \) mark on the cassette compartment until it clicks.
4 Wait for the cassette compartment to retract automatically and close the cassette compartment cover.

**IMPORTANT**
- Do not interfere with the cassette compartment while it is opening or closing automatically, or attempt to close the cover before the cassette compartment has fully retracted.
- Be careful not to get your fingers caught in the cassette compartment cover.

**NOTES**
If the camcorder is connected to a power source, cassettes can be inserted/removed even if the \(\text{POWER} \) switch is set to \(\text{OFF} \).
Preparing the Camcorder

1 Turn on the camcorder.
2 Move the lens cover switch down to \( \downarrow \) to open the lens cover.
3 Adjust the viewfinder.
   Keep the LCD panel closed to use the viewfinder and adjust the dioptic adjustment lever as necessary.
4 Fasten the grip belt.
   Adjust the grip belt so that you can reach the zoom lever with your index finger, and the start/stop button with your thumb.

Adjusting the LCD Screen

Rotating the LCD Panel

Open the LCD panel 90 degrees.
You can rotate the panel 90 degrees downward.

You can rotate the panel 180 degrees toward the lens (allowing the subject to monitor the LCD screen while you use the viewfinder). Rotating the panel 180 degrees is also useful if you wish to include yourself when recording with the self timer.
Using the Menus

Many of the camcorder’s functions can be adjusted from the menus that open after pressing the FUNC. button (FUNC.). For details about the available menu options and settings, refer to Menu Options Lists (25).

Selecting a FUNC. Menu Option

1 Press FUNC.
2 Select (△▼) the icon of the function you want to change from the left side column.
3 Select (△▼) the desired setting from the available options at the bottom bar.
   The selected option will be highlighted in light blue. Menu items not available will appear grayed out.
4 Press [FUNC.] to save the settings and close the menu.
   • You can press [FUNC.] to close the menu at any time.
   • With some settings you will need to press (○) and make further selections. Follow the additional operation guides that will appear on the screen (such as the joystick icon ◼, small arrows, etc.).

Selecting an Option from the Setup Menus

The title of the selected menu appears on top of the screen and under it the list of settings.

4 Select (▲▼) the setting you want to change and press (○).
   • An orange frame will indicate the menu item currently selected. Menu items not available will appear grayed out.
   • To return to the menu selection screen, select (▼) [ ◼ RETURN] and press (○).

5 Select (▲▼) the desired option and press (○) to save the setting.

6 Press [FUNC.].
   You can press [FUNC.] to close the menu at any time.

1 Press [FUNC].
2 Select (▲▼) the [ ] icon and press (○) to open the setup menus.
   You can also hold [FUNC.] pressed down for more than 2 seconds to open directly the setup menus screen.
3 Select (▲▼) the desired menu from the left side column and press (○).
First Time Settings

Changing the Language
The language for on-screen and menu displays can be changed. The list of available languages depends on the region where you purchased the camcorder.

Language Set A
English, German, Spanish, French, Italian, Polish, Romanian, Turkish, Russian, Ukrainian, Arabic and Persian.

Language Set B
English, Simplified Chinese, Traditional Chinese and Thai.

Changing the Time Zone
The time zone setting appears. The default setting is Paris or Singapore, depending on the region of purchase.

1 Press [FUNC.] .
2 Select ( ▲▼ ) the  icon and press ( ) to open the setup menus.
3 Select ( ▲▼ ) [DATE/TIME SETUP] and press ( ) .
4 Select ( ▲▼ ) [T.ZONE/DST] and press ( ) .

5 Select ( ▲▼ ) your time zone and press ( ) .

To adjust for daylight saving time, select the time zone with the * mark next to the area.

6 Press [FUNC.] to close the menu.

NOTES
- If you changed the language by mistake, follow the  mark next to the menu item to change the setting.
Setting the Date and Time

1 Press .
2 Select ( ) the  icon and press ( ) to open the setup menus.
3 Select ( ) [DATE/TIME SETUP] and press ( ).
4 Select ( ) [DATE/TIME] and press ( ).
   Blinking arrows will be displayed around the first field of the date.
5 Change each field of the date and time with the joystick's ( ) and move ( ) to the next field.
6 Press ( ) to start the clock.
7 Press ( ) to close the menu.

NOTES
You can also change the date format ( 29).
Recording

Recording Movies

Before You Begin Recording
Make a test recording first to check if the camcorder operates correctly. If necessary, clean the video heads (2).

1 Move the lens cover switch down to (to open the lens cover.
2 Holding the lock button pressed down, set the switch to CAMERA.
3 Press [Start/Stop] to begin recording. Press [Start/Stop] again to pause the recording.

TO REVIEW THE LAST SCENE RECORDED

1 Set the mode switch to (P).
2 If the joystick guide does not appear on screen, press ( ) to display it.
3 Push the joystick ( ) momentarily towards ( ) and release it.
   • The camcorder will play back a few seconds of the last recording made and return to record pause mode.
   • You can also hold the joystick pressed ( ) towards ( ) or ( ) towards ( ) to play back the tape (reverse or forward respectively) to locate the point where you want to start recording.

WHEN YOU HAVE FINISHED RECORDING
1 Close the lens cover and the LCD panel.
2 Turn off the camcorder.
3 Remove the tape.
4 Disconnect the power source and remove the battery pack.

NOTES
• About the recording time: By changing the recording mode you can change the video

Basic Functions
quality and as a result, also the available recording time (27).

- Previous recordings overwritten by a new recording cannot be recovered. Before you start recording, search for the end of the last recording (24).

- To protect the tape and video heads, the camcorder will enter the stop mode (■) if left in record pause (■■) mode for 4 minutes 30 seconds. To resume recording press [Start/Stop].

- When recording in very loud places (such as fireworks shows or concerts), sound may become distorted or it may not be recorded at the actual levels. This is not a malfunction.

- **About the Power Save mode:** To save power when the camcorder is powered by a battery pack, the camcorder will automatically shut off if left without any operations for 5 minutes (29). To restore the power, turn the camcorder off and then on again.

- **About the LCD and viewfinder screen:** The screens are produced using extremely high-precision manufacturing techniques, with more than 99.99% of the pixels operating to specification. Less than 0.01% of the pixels may occasionally misfire or appear as black, red, blue or green dots. This has no effect on the recorded image and does not constitute a malfunction.

- **When using a tripod:** Do not leave the viewfinder exposed to direct sunlight as it may melt (due to concentration of the light by the lens). Do not use tripods with fastening screws longer than 5.5 mm. Doing so may damage the camcorder.

- **When recording movies, try to get a calm, stable picture.**

Excessive camcorder movement while shooting and extensive use of fast zooms and panning can result in fidgety, jittery scenes. In extreme cases the playback of such scenes may result in visually induced motion sickness. If you experience such a reaction, immediately stop the playback and take a rest break as necessary.

---

#### Zooming

**POINTS TO CHECK**

<table>
<thead>
<tr>
<th>CAMERA</th>
<th>PLAY</th>
</tr>
</thead>
<tbody>
<tr>
<td>(7)</td>
<td></td>
</tr>
</tbody>
</table>

**CAMERA** In addition to the optical zoom, the digital zoom (26) (MD120/MD111/MD110 up to 1000x, MD101 up to 800x) is also available.

**Optical Zoom**

(35x, MD101 30x)

Move the zoom lever toward **W** to zoom out (wide-angle). Move it toward **T** to zoom in (telephoto).

You can also change the zoom speed (26). You can select one of three fixed zoom speeds or a variable speed that depends on how you operate the zoom lever: Press gently for a slow zoom; press harder for faster zooms.

**NOTES**

- When set to [VARIABLE], the zoom speed will be faster in the record pause mode.

- Keep at least 1 m to the subject. At wide-angle, you can focus on a subject as close as 1 cm.
**Playback**

**Playing Back Movies**
Play back the tape on the LCD display or close the LCD panel to use the viewfinder. You can also turn the LCD panel and close it with the screen facing out.

1. Holding the lock button pressed down, set the **POWER** switch to **PLAY**.
2. If the joystick guide does not appear on screen, press ( ) to display it.
3. Locate the point where you want to begin the playback.
   Push the joystick ( ) towards \( \llcorner \) to rewind the tape or ( ) towards \( \lrcorner \) to fast forward.
4. Push the joystick ( ) towards \( \triangledown / \square \) to begin the playback.

**DURING PLAYBACK**
5. Push the joystick ( ) towards \( \triangledown / \square \) again to pause the playback.
6. Push the joystick ( ) towards \( \square \) to stop the playback.

**TO ADJUST THE VOLUME**
1. Press **FUNC.**.
2. Select ( ) [ ] **SPEAKER VOLUME** and adjust ( ) the volume.
   - The sound from the built-in speaker will be muted when you close the LCD panel or while the STV-250N Stereo Video Cable is connected to the AV terminal.
   - If you turn off the volume completely, the icon will change to \( \square \).
3. Press **FUNC.** to close the menu.

**SPECIAL PLAYBACK MODES**
There is no sound during the special playback modes.

- **Fast Playback:** Push the joystick ( ) towards \( \llcorner \) or ( ) towards \( \lrcorner \). Hold the joystick pressed down to rewind/fast forward the tape while continuing the playback.

**NOTES**
- You can display the date and time of the recording ( 37).
- During some special playback modes, you may notice some video problems (bloody video artifacts, banding, etc.) in the playback picture.
- To protect the tape and video heads, the camcorder will enter the stop mode ( ) if left in playback pause ( ) mode for 4 minutes 30 seconds. To resume the playback push the joystick ( ) towards \( \triangledown / \square \).
Locating the End of the Last Scene

After playing back a tape, use this function to locate the end of the last scene recorded in order to continue recording from that point.

POINTS TO CHECK

Stop the playback before using this function.

1 Press FUNC.
2 Select ( ▲▼ ) [ ▶ END SEARCH ] and press (  ).
3 Select ( ▶ ) [ EXECUTE ] and press (  ).
   • “END SEARCH” appears.
   • The camcorder rewinds/fast forwards the tape, plays back the last few seconds of the recording and stops the tape.
   • To cancel the search push the joystick ( ▼ ) towards ■.

NOTES

• End search cannot be used once you remove the cassette.
• If there are blank sections between recordings, the end search may not work correctly.

Magnifying the Playback Image

During playback, movies and still images can be magnified up to 5 times. You can also select the area to be magnified.

1 Move the zoom lever toward T.
   • The image is magnified by 2 times and a frame appears indicating the position of the magnified area.
   • To further enlarge the image, move the zoom lever toward T. To reduce the magnification, move the zoom lever toward W.
   • ● will appear for images that cannot be enlarged.
2 Select ( ▲▼ , ◀▶ ) the enlarged area of the picture with the joystick.
   To cancel the magnification, move the zoom lever toward W until the frame disappears.

IMPORTANT

While the magnification position frame is displayed, it will replace the joystick guide. Cancel the magnification to return to normal playback.
Menu Options Lists

Menu items not available appear grayed out. For details about how to select an item, refer to *Using the Menus* (17).

**FUNC. Menu**

**Recording programs** (30)

Mode switch: [PROGRAM AE], [PORTRAIT], [SPORTS], [NIGHT], [SNOW], [BEACH], [SUNSET], [SPOTLIGHT], [FIREWORKS]

**White balance** (34)

Mode switch: [AUTO], [DAYLIGHT], [TUNGSTEN], [SET]

**Image effect** (35)

Mode switch: [IMAGE EFFECT OFF], [VIVID], [NEUTRAL], [SOFT SKIN DETAIL]

**Digital effects** (38)

Mode switch: [D.EFFECT OFF], [FADER], [EFFECT]

**SPEAKER VOLUME** (23)

Adjust (↕) the volume with the joystick.

**CAMERA [PLAY]**

**REC PAUSE** (43)

Press (◉) to enter the record pause mode.

**END SEARCH** (24)

Press (◉) to search.

**Setup menus**

**CAMERA SETUP**

**SHUTTER** (31)

Mode switch: [PROGRAM AE], [AUTO], [1/50], [1/120], [1/250], [1/500], [1/1000], [1/2000]

**A.SL SHUTTER**

[ON], [OFF]

The camcorder automatically uses slow shutter speeds to obtain brighter recordings in places with insufficient lighting.

- The camcorder uses shutter speeds down to 1/25.
If a trailing afterimage appears, set the slow shutter to [OFF].

D.ZOOM

Mode switch: [P]
[ON ON], [OFF OFF]
The image stabilizer compensates for camcorder shake even at full telephoto.

When activated, the camcorder will switch automatically to the digital zoom when you zoom in beyond the optical zoom range.

With the digital zoom the image is digitally processed, so the image resolution will deteriorate the more you zoom in.

The digital zoom indicator will appear in light blue from 30x up to 105x (MD101 only: 90x) and dark blue from 105x (MD101 only: 90x) up to 1000x (MD101 only: 800x).

The digital zoom cannot be used with the [NIGHT] recording program.

ZOOM SPEED

[VAR VARIABLE], [SPEED 3], [SPEED 2], [SPEED 1]

When set to [VAR VARIABLE] the zoom speed depends on how you operate the zoom lever: Press lightly for a slow zoom; press harder for faster zooms.

The fastest zoom speed can be achieved with [VAR VARIABLE]. Among the fixed zoom speeds, [SPEED 3] is the fastest and [SPEED 1] the slowest.

IMG STAB

Mode switch: [P]
[ON ON], [OFF OFF]
The image stabilizer compensates for camcorder shake even at full telephoto.

The image stabilizer is designed to compensate for a normal degree of camcorder shake.

The image stabilizer may not be effective when recording in dark places using the [NIGHT] recording program.

The image stabilizer cannot be turned off when the mode switch is set to EASY.

We recommend setting the image stabilizer to [OFF] when using a tripod.

WIDESCREEN

[ON ON], [OFF OFF]
The camcorder uses the full width of the CCD providing high-resolution 16:9 recording.

Since the displays on the camcorder have an aspect ratio of 16:9, recordings with a 4:3 aspect ratio will appear in the center of the screen with black sidebars.

Playing back a widescreen recording: TV sets compatible with the Video ID-1 system will automatically switch to wide (16:9) mode. Otherwise, change the aspect ratio of the TV manually. To play back on a TV with normal aspect ratio (4:3) change the [TV TYPE] setting accordingly (p. 27).

SELF TIMER

[ON ON], [OFF OFF]
VCR SETUP

**REC MODE**

**CAMERA** [SP] [STD PLAY], [LP] [LONG PLAY]
- Recording in LP mode extends the available recording time on the tape 1.5 times.
- Depending on the condition of the tape (long usage, imperfections, etc.) you may notice some video problems (blocky video artifacts, banding, etc.) in the playback picture when playing back recordings made in LP mode. We recommend using the SP mode for important recordings.
- If you make recordings in both SP and LP modes on the same tape, during playback you may notice some video problems in the picture at the point where the recording mode changes.
- When playing back in this camcorder tapes recorded in LP mode with other devices or vice versa, you may notice some problems in the playback picture or the sound may stop briefly.

**TV TYPE**

**CAMERA** [4:3] [NORMAL TV], [16:9] [WIDE TV]
- In order to display the picture in full and in the correct aspect ratio, select the setting according to the type of television to which you will connect the camcorder.
- [NORMAL TV]: TV sets with 4:3 aspect ratio.
- [WIDE TV]: TV sets with 16:9 aspect ratio.

AUDIO SETUP

**OUTPUT CH**

**CAMERA** [L/R], [L/L], [R/R]

**WIND SCREEN**

**CAMERA** [P] [AUTO], [OFF]
- The camcorder automatically reduces the background sound of wind when recording outdoors.
- The wind screen cannot be turned off when the mode switch is set to EASY.

**12bit AUDIO**

**CAMERA** [ST1] [STEREO1], [ST2] [STEREO2], [1:1 MIX/FIXED], [MIX/VAR.]

**MIX BALANCE**

**CAMERA** [ST1] [STEREO1], [ST2]
- When [12bit AUDIO] is set to [MIX/VAR.], adjust (▲▼) the sound balance with the joystick.
- The camcorder will retain the audio balance adjustment, however if you turn off the camcorder, [12bit AUDIO] will be reset to [STEREO1].

**AUDIO MODE**

**CAMERA** [16bit], [12bit] [12bit]
**DISPLAY SETUP**

**BRIGHTNESS**

Adjust the brightness of the LCD display with the joystick.

- Changing the brightness of the LCD display does not affect that of the viewfinder or the recordings.

**BACKLIGHT**

- [NORMAL]*, [BRIGHT]

* The default setting is [BRIGHT] when you power the camcorder using the compact power adapter.

**TV SCREEN**

- [ON ON], [OFF OFF]

When set to [ON ON], the camcorder’s on-screen displays will appear also on the screen of a connected TV or monitor. When the date and time are displayed on the camcorder’s screen they will also appear on a connected TV regardless of the [TV SCREEN] setting. Turn off the date/time display with the [DATA CODE] setting (29).

**MARKERS**

- [OFF OFF], [LEVEL(WHT)], [LEVEL(GRY)], [GRID(WHT)], [GRID(GRY)]

You can display a grid or a horizontal line at the center of the screen. The markers are available in white or gray. Use the markers as a reference to make sure your subject is framed correctly (vertically and/or horizontally).

- Using the markers will not affect the recordings on the tape.

**DISPLAYS**

- [ON ON], [OFF<PLAYBK>]

You can hide the on-screen displays to show only the playback picture on the full screen.

- Tape operation displays appear for 2 seconds.
- Warning messages and the data code (if activated) will appear, even when set to [OFF<PLAYBK>].
- All on-screen displays will appear while the playback image is magnified or a digital effect is activated.

**6SEC.DATE**

- [ON ON], [OFF OFF]

When you start playing back a tape or when the date of the recording changes, the date and time will be displayed for 6 seconds.
The list of available languages depends on the region where you purchased the camcorder.

**Language Set A:**
- [DEUTSCH], [ENGLISH], [ESPAÑOL], [FRANÇAIS], [ITALIANO], [POLSKI], [ROMÂNĂ], [TÜRKÇE], [РУССКИЙ], [УКРАЇНСЬКА], [فارسی], [العربية], [فارسی], [العربية]

**Language Set B:**
- [ENGLISH], [简体中文], [繁體中文], [ภาษาไทย]

**DEMO MODE**

**SYSTEM SETUP**

**BEEP**

**POWER SAVE**

**DATE/TIME SETUP**

**DATE FORMAT**

*Changes the date format for on-screen displays.*
Using the Recording Programs

**Easy Recording**
The camcorder adjusts the focus, exposure and other settings automatically, allowing you to just point and shoot.

**PROGRAM AE**
The camcorder sets the aperture and shutter speed.

**NIGHT**
Use this mode to record in low-light conditions.

**SUNSET**
Use this mode to record sunsets in vibrant colors.

**PORTRAIT**
The camcorder uses a large aperture, achieving a focus on the subject while blurring other distracting details.

**SNOW**
Use this mode to record in bright ski resorts. It prevents the subject from being underexposed.

**SPOTLIGHT**
Use this mode to record spotlit scenes.

**SPORTS**
Use this mode to record sports scenes such as tennis or golf.

**BEACH**
Use this mode to record on a sunny beach. It prevents the subject from being underexposed.

**FIREFOWRS**
Use this mode to record fireworks.
**P**: Changing the Shutter Speed and Special Scene Programs

Use the automatic exposure (AE) program to set the shutter speed or select one of the special scene recording programs.

**POINTS TO CHECK**

**Mode switch:**

**TO SET THE SHUTTER SPEED IN THE [PROGRAM AE] RECORDING PROGRAM**

**FUNCTION**

**Shutter speed guidelines**

<table>
<thead>
<tr>
<th>Shutter Speed</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/50</td>
<td>For general recordings.</td>
</tr>
<tr>
<td>1/120</td>
<td>For recording indoor sports scenes.</td>
</tr>
<tr>
<td>1/250, 1/500, 1/1000</td>
<td>For recording from within a car or train, or for recording moving subjects such as roller coasters.</td>
</tr>
<tr>
<td>1/2000</td>
<td>For recording outdoor sports such as golf or tennis on sunny days.</td>
</tr>
</tbody>
</table>

Note that on screen only the denominator is displayed – “P 250” indicates a shutter speed of 1/250, etc.

**NOTES**

- Do not change the position of the mode switch while recording as the brightness of the image may change abruptly.
- [PROGRAM AE]
  - When setting the shutter speed, the number displayed will flash if the value selected is not appropriate for the recording conditions. In such case, select a different value.
  - If you use a slow shutter speed in dark places, you can obtain a brighter image, but the image quality may be lower, and the autofocus may not work well.
  - The image may flicker when recording with high shutter speeds.
  - The shutter speed resets to [AUTO] when you set the mode switch to [EASY] or change the recording program.
- [PORTRAIT]/[SPORTS]/[BEACH]/[SNOW]
  - The picture may not appear smooth during playback.
- [PORTRAIT]
  - The blur effect of the background increases the more you zoom in (T).
- [NIGHT] - Moving subjects may leave a trailing afterimage.
- White points may appear on the screen.
- Autofocus may not work as well as in other modes. In such case, adjust the focus manually.

- [SNOW]/[BEACH] - The subject may become overexposed on cloudy days or in shaded places. Check the image on the screen.

- [FIREWORKS] - To avoid camcorder shake, we recommend using a tripod.

Adjusting the Picture: Exposure, Focus and Color

Manual Exposure Adjustment

At times, backlit subjects may appear too dark (underexposed) or subjects under very strong lights may appear too bright or glaring (overexposed). To correct this, you can manually adjust the exposure.

POINTS TO CHECK

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick (▲) towards [EXP].
   - [EXP] on the joystick guide changes to light blue and the exposure adjustment indicator and the neutral value “±0” appear on the screen.
   - If you operate the zoom during exposure lock, the brightness of the image may change.
3. Adjust (●) the brightness of the image as required.
   - The adjustment range and the length of the exposure adjustment indicator will vary depending on the initial brightness of the picture.
   - Pushing the joystick (▲) towards [EXP] again will return the camcorder to automatic exposure.
4. Push the joystick (▼) towards [BACK] to save the exposure setting.
Manual Focus Adjustment

Autofocus may not work well on the following subjects. In such case, focus manually.

Reflective surfaces

Subjects with low contrast or without vertical lines

Fast moving subjects

Through wet windows

Night scenes

1 Adjust the zoom.
2 If the joystick guide does not appear on screen, press ( ) to display it.
3 Push the joystick ( ▼ ) towards [FOCUS] to activate the manual focus.
   [FOCUS] on the joystick guide will be displayed in light blue and “MF” appears on the screen.
4 Adjust ( ◄ ► ) the focus as necessary.
   • Push the joystick ( ► ) towards ▲ for a farther focal distance or push it ( ◄ ) towards ▼ for a closer focal distance.
   • Pushing the joystick ( ▼ ) towards [FOCUS] again will return the camcorder to autofocus.
5 Push the joystick ( ▲ ) towards [BACK] to save the focus adjustment.

NOTES

The camcorder will automatically return to autofocus when you set the mode switch to EASY.

Infinity Focus

Use this function when you wish to focus on faraway subjects such as mountains or fireworks.

1 Adjust the zoom.
2 Keep the joystick pushed ( ▼ ) towards [FOCUS] for more than 2 seconds.
   • ∞ appears.
   • Pushing the joystick ( ▼ ) towards [FOCUS] again will return the camcorder to autofocus.
   • Operating the zoom or the joystick ( ◄ ► ) will return the camcorder to manual focus adjustment.
3 Push the joystick ( ▲ ) towards [BACK] to save the focus adjustment.
White Balance
The white balance function helps you accurately reproduce colors under different lighting conditions so that white objects will always look truly white in your recordings.

POINTS TO CHECK
Mode switch: [P]

Options
* Default value

[AUTO]*
Settings are automatically set by the camcorder. Use this setting for outdoor scenes.

[DAYLIGHT]
For recording outdoors on a bright day.

[TUNGSTEN]
For recording under tungsten and tungsten type (3-wavelength) fluorescent lighting.

[SET]
Use the custom white balance for special situations not covered by the other options. The custom white balance will ensure that white subjects appear white under various lighting conditions.

TO SET THE CUSTOM WHITE BALANCE
1 Point the camcorder at a white object, zoom in until it fills the whole screen and press ( ). When the adjustment is completed, stops flashing and stays on. The camcorder retains the custom setting even if you turn off the camcorder.
2 Press [FUNC.] to save the setting and close the menu.

NOTES
- When you select the custom white balance [SET]:
  - Make the white balance adjustment in a place with sufficient light.
  - Set [D.ZOOM] to [OFF] (26).
  - Readjust the white balance if the lighting conditions change.
  - Very rarely and depending on the light source, may keep on flashing instead of staying on. Even in that case, the white balance would be properly adjusted and the results should be better than with [AUTO].
- Custom white balance may provide better results in the following cases:
  - Changing lighting conditions
  - Close-ups
  - Subjects in a single color (sky, sea or forest)
  - Under mercury lamps and certain types of fluorescent lights

* When you select [SET], do not press [FUNC.] and continue instead with the procedure below.
Image Effects
You can use the image effects to change the color saturation and contrast to obtain different results.

POINTS TO CHECK

CAMERA | PLAY | (7)

Mode switch: P

Options

[ IMAGE EFFECT OFF]*
Records with no image enhancing effects.

[VIVID]
Emphasizes the contrast and color saturation.

[NEUTRAL]
Tones down the contrast and color saturation.

[SOF SKIN DETAIL]
Softens the details in the skin tone area for a more complimentary appearance.

Audio Recording and Playback

Audio Recording Mode
You can change the quality of the audio recording.

POINTS TO CHECK

CAMERA | PLAY | (7)

Options

[16bit]
Records audio at the highest quality.

[12bit]*
Records audio on 2 channels (Stereo 1) leaving 2 channels free (Stereo 2) for audio dubbing or for adding a sound track with an external device. Audio dubbing cannot be performed with this camcorder.

FUNCTION (17)

Icon of the currently selected Image Effect

FUNCTION

Desired option

ABOUT THE WIND SCREEN
When using the built-in microphone, the camcorder automatically reduces the background sound of wind, but you can turn the wind screen off when you want the microphone to be as sensitive as possible (27).
TO USE AN EXTERNAL MICROPHONE

Connect the external microphone to the MIC terminal. Use commercially available condenser microphones with their own power supply and a cable no longer than 3 m. You can connect almost any stereo microphone with a 3.5 mm plug but the audio recording levels may vary.

Audio Playback Modes

Selecting the Audio Channel

You can select the audio channel to play back when playing back a tape with audio recorded on two channels (either stereo sound or bilingual audio signals).

POINTS TO CHECK

Options

Options

Selecting the Audio Track on a Tape with Dubbed Audio

You can select the audio track to play back when playing back a tape that has a dubbed audio track (Stereo 2) in addition to the original recorded audio (Stereo 1).

Points to Check

Options

* Default value

Original sound only.

Dubbed audio only.

Mixed audio with the original sound and the dubbed audio at the same level.

Mixed audio where the balance between the original sound (ST1) and the dubbed audio (ST2) can be adjusted.
**Other Functions**

**Data Code**

The camcorder keeps a data code containing the date and time of recording. You can select the data to be displayed.

1. Set the camcorder in record pause mode.
2. Press [FUNC. (17)] to display the menu.
3. Press [MENU] to enter the menu selection mode.
4. Press [AUDIO SETUP] to display the audio setup menu.
5. Select [12bit AUDIO].
6. Press [FUNC. (17)] to display the menu again.
7. Press [DISPLAY SETUP/DATE] to display the display setup menu.
8. Select [DATA CODE].
9. Press [FUNC. (17)] to display the menu one more time.
10. Press [ Desired option] to select the desired data code.

* When you select [MIX/VAR.], adjust the mix balance with the [MIX BALANCE] setting (27).

**Options**

- **[ OFF ]**
  - No data code display.
- **[ DATE, TIME ]**
  - Displays the date or time when the scene or still image was recorded.
- **[ DATE & TIME ]**
  - Displays both the date and time of the recording.

**Self Timer**

1. Set the camcorder in record pause mode.
2. Press [ CANCEL/PLAY ] to enter the record pause mode.
3. Press [ CANCEL/PLAY ] to display the menu.
4. Press [FUNC. (17)] to display the menu again.
5. Press [MENU] to enter the menu selection mode.
6. Press [DISPLAY SETUP/DATE] to display the display setup menu.
7. Select [SELF TIMER].
8. Press [FUNC. (17)] to display the menu one more time.
9. Press [ Desired option] to select the desired self timer option.

* Default value

---

* When you select [MIX/VAR.], adjust the mix balance with the [MIX BALANCE] setting (27).
Set [SELF TIMER] to [OFF OFF] to cancel the self timer.

Press [Start/Stop].

The camcorder starts recording after a 10-second countdown. The countdown appears on the screen.

**NOTES**

Once the countdown has begun, you can also press [Start/Stop] to cancel the self timer. The self timer will also be canceled if you turn off the camcorder.

---

**Digital Effects**

**[FADER] Faders**

Begin or end scenes with a fade to or from black. You can preview the effect on the display.

- [FADE-T] (fade trigger)
- [CORNER] (corner wipe)
- [FLIP]
- [ZIGZAG]
- [TIDE]

**[EFFECT] Effects**

Add flavor to your recordings. Sound will be recorded normally. You can preview the effect on the display.

- [BLK&WHT] (black and white)
- [ART]
- [BALL]
- [WAVE]
- [MIRROR]
- [SEPIA]
- [MOSAIC]
- [CUBE]
- [COLOR M.]

**POINTS TO CHECK**

- Set mode switch to [P].

**Setting**

- Icon of the currently selected Digital Effect

- Desired fader/effect*
Applying

1 Press **[D.EFFECTS]** to activate the fader/effect.
   - The icon of the selected effect turns green.
   - Press **[D.EFFECTS]** again to deactivate the fader/effect.

To Fade In
Press **[D.EFFECTS]** ...

- **CAMERA** : ...in record pause mode, then press **[Start/Stop]** to start recording with a fade in.
- **PLAY** : ...in playback pause mode, then push the joystick (▲) towards ▶/■ to fade in and start the playback.

To Fade Out
Press **[D.EFFECTS]** ...

- **CAMERA** : ...while recording, then press **[Start/Stop]** to fade out and pause the recording.
- **PLAY** : ...during playback, then push the joystick (▲) towards ▶/■ to fade out and pause the playback.

To Activate an Effect
Press **[D.EFFECTS]** ...

- **CAMERA** : ...while recording or in record pause mode.
- **PLAY** : ...during playback.

**NOTES**
- When you are not using the digital effect, select **[D.EFFECT OFF]**.
- The camcorder retains the setting last used even if you turn off the digital effects or change the recording program.
- The digital effects are not available when [TV TYPE] is set to [NORMAL TV] and the stereo video cable is connected to the AV terminal.
Connecting to a TV or VCR

Connection Diagrams
Turn off all the devices when making the connections and refer also to the instruction manual of the connected device.

Open the terminal cover to access.

<table>
<thead>

**Playback on a TV Screen**

The quality of the playback picture will vary depending on the connected TV and the type of connection used.

Before making the connections, select the [TV TYPE] setting according to the TV set to which you will connect the camcorder (27).

**Connecting**

Connect the camcorder to the TV following one of the connection diagrams shown in the previous section **Connection Diagrams** (40).

**Playback**

1. Turn on the camcorder and the connected TV or VCR.
   On a TV: Set the input selector to VIDEO. On a VCR: Set the input selector to LINE (IN).
2. Start the playback of the movies (23).

**NOTES**

- Turn off all the devices before starting the connections.
- We recommend powering the camcorder using the compact power adapter.

**Recording to a VCR or Digital Video Recorder**

You can copy your recordings by connecting the camcorder to a VCR or a digital video device. When recording to a digital video recorder using the DV terminal, you can copy recordings with virtually no generation loss in video and sound quality.

Connect the camcorder to the external device following one of the connection diagrams shown in the previous section **Connection Diagrams** (40).

**Connecting**

Connect the camcorder to a VCR or other analog device using connection types 1 or 3, or to a DVD recorder or other digital recording device using connection type 2, as shown in the previous section **Connection Diagrams** (40).

**Recording**

1. This camcorder: Load the recorded cassette.
2. Connected device: Load a blank cassette or disc and set the device to record pause mode.
3. This camcorder: Locate the scene you wish to copy and pause the playback shortly before the scene.
4. This camcorder: Resume the movie playback.
   When using an analog connection you can include in the copy also the date/time of the original recording (37).
5. Connected device: Begin recording when the scene you wish to copy appears. Stop recording when copying is complete.
6. This camcorder: Stop playback.

**NOTES**

- We recommend powering the camcorder using the compact power adapter.
- When recording to a VCR using an analog connection –connection types 1 or 3 (40)–, the quality of the edited tape will be lower than the original.
Connecting to a TV or VCR

When recording to a digital video recorder using the DV terminal —connection type 2 (40)—:
- If the picture does not appear, disconnect the DV cable and restore the connection after a short while or turn the camcorder off and then on again.
- Proper operation cannot be guaranteed for all digital devices equipped with a DV terminal. If the operation does not work, use the AV terminal.

Digital Video Dubbing

You can input video from other digital video devices and record the input video on the tape in the camcorder.

Connecting

Connect the camcorder to the video input source using the digital connection —connection type 2 (40)— shown in the previous section Connection Diagrams.

Dubbing

1 Load a blank cassette in this camcorder.
2 Connected device: Load the recorded cassette or disc.
3 Press [FUNC.], select (\(\uparrow\downarrow\)) [● / REC PAUSE] and press (○).
4 Select (\(\leftarrow\rightarrow\)) [EXECUTE] and press (○).
5 Connected device: Start the playback.

In record pause mode and while recording you can check the picture on the camcorder’s screen.

6 When the scene you wish to record appears, push the joystick (▲) towards ● / to begin recording. Recording starts.
7 While recording, push the joystick (▲) towards ● / to pause the recording. In record pause, push the joystick (▲) towards ● / again to resume recording.
8 Push the joystick (▼) towards ■ to stop recording.
9 Connected device: Stop the playback.

IMPORTANT

- Blank sections may be recorded as anomalous picture.
- If the picture does not appear, disconnect the DV cable and restore the connection after a short while or turn the camcorder off and then on again.
- You can only record video signals in DV standard (standard definition, SP or LP mode) from devices carrying the DV logo. Note that signals from identically shaped DV (IEEE1394) terminals may be in different video standards.

NOTES

We recommend powering the camcorder using the compact power adapter.

Concerning Copyright

Copyright Precaution
Certain pre-recorded video tapes, films and other materials, as well as some television programs are copyrighted. Unauthorized
recording of these materials may violate copyright protection laws.

Copyright Signals
During playback: If you try to play back a tape that contains copyright control signals for protection of software, “COPYRIGHT PROTECTED PLAYBACK IS RESTRICTED” appears for a few seconds and the camcorder displays a blank blue screen. You cannot playback the contents of the tape.

During recording: If you try to record from software that contains copyright control signals for protection of software, “COPYRIGHT PROTECTED DUBBING RESTRICTED” appears. You cannot record the contents of the software.
You cannot record copyright protection signals to a tape using this camcorder.
Connecting to a Computer

PC Connection Diagrams

**DV Terminal**
- Check the type and orientation of the terminal and make sure you connect the DV cable properly.
- Use the optional CV-150F (4 pin-4 pin) or CV-250F (4 pin-6 pin) DV cable.

---

<td>4-pin</td>
</tr>
<tr>
<td>DV</td>
<td>DV Cable (Optional)</td>
<td>6-pin*</td>
</tr>
</tbody>
</table>

1. Output connection (Signal Flow ➔) to a computer with a DV (IEEE1394) terminal or a DV capture board.

* Be careful to correctly insert the 6-pin plug into the DV terminal. Inserting it in the wrong direction can result in damage to the camcorder.
Transferring Video Recordings

You can transfer recordings to a computer using the DV terminal.

Equipment and System Requirements

- A computer equipped with an IEEE1394 (DV) terminal or an IEEE1394 (DV) capturing board.
- A DV cable (Use the optional CV-150F (4 pin-4 pin) or CV-250F (4 pin-6 pin) DV Cable).
- Video Editing Software.
- The appropriate driver
A driver is preinstalled on Windows operating systems later than Windows 98 Second Edition and Mac operating systems later than Mac OS 9, and will be installed automatically.

Connecting

1. Start the computer.
2. Set the camcorder to PLAY mode.
3. Connect the camcorder to the computer using the digital connection –connection type 45– shown in the previous section PC Connection Diagrams.
4. Start the video editing software.
   Refer to the instruction manual of the editing software.

IMPORTANT

- The video transfer may not work correctly depending on the software and the specifications/settings of your computer.
- If the computer freezes while the camcorder is connected to it, disconnect the DV cable and turn off the camcorder and the computer. After a short while, turn them on again, set the camcorder to PLAY mode and restore the connection.
- Before connecting the camcorder to the computer using a DV cable, make sure that no other IEEE1394 device is connected to the computer.
- Depending on the video editing software, you may need to set the POWER switch on the camcorder to a mode other than PLAY. Refer to the instruction manual of the editing software.

NOTES

- We recommend powering the camcorder using the compact power adapter.
- Refer also to the instruction manual of the computer.
# Troubleshooting

If you have a problem with your camcorder, refer to this checklist. Consult your dealer or a Canon Service Center if the problem persists.

## Power Source

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Camcorder will not turn on.</td>
<td>Battery pack is exhausted. Replace or charge the battery pack.</td>
</tr>
<tr>
<td>The camcorder switches off by itself.</td>
<td>Attach the battery pack correctly.</td>
</tr>
<tr>
<td>The cassette compartment cover will not open.</td>
<td>Use the compact power adapter.</td>
</tr>
<tr>
<td>The cassette compartment stopped half way while inserting/removing a tape.</td>
<td>Charge the battery pack in temperatures between 0°C and 40°C.</td>
</tr>
<tr>
<td>The LCD/viewfinder switches on and off.</td>
<td>Battery packs become hot with use and may not charge. When the battery pack is outside the charging temperature range, the CHG (charge) indicator will flash irregularly. The charging will start once the battery pack temperature is below 40°C.</td>
</tr>
<tr>
<td>Battery pack will not charge.</td>
<td>The battery pack is damaged. Use a different battery pack.</td>
</tr>
<tr>
<td>If you connect a faulty power adapter or battery pack, the CHARGE indicator flashes approx. twice per second and the charging stops.</td>
<td>Check that the compact power adapter is correctly connected to the camcorder.</td>
</tr>
</tbody>
</table>

## Recording/Playback

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>

Handling Precautions

Camcorder

- Do not carry the camcorder by the LCD panel. Be careful when closing the LCD panel.
- Do not leave the camcorder in places subject to high temperatures (like the inside of a car under direct sunlight), or high humidity.
- Do not use the camcorder near strong electric or magnetic fields such as above TVs, near plasma TVs or mobile phones.
- Do not point the lens or viewfinder at strong light sources. Do not leave the camcorder pointed at a bright subject.
- Do not use or store the camcorder in dusty or sandy places. The camcorder is not waterproof – avoid also water, mud or salt. If any of the above should get into the camcorder it may damage the camcorder and/or the lens.
- Be careful of heat generated by lighting equipment.
- Do not disassemble the camcorder. If the camcorder does not function properly, consult qualified service personnel.
- Handle the camcorder with care. Do not subject the camcorder to shocks or vibration as this may cause damage.

Battery Pack

DANGER!
Treat the battery pack with care.

- Keep it away from fire (or it might explode).
- Do not expose the battery pack to temperature higher than 60 °C. Do not leave it near a heater or inside a car in hot weather.
- Do not try to disassemble or modify it.
- Do not drop or knock it.
- Do not get it wet.

- Charged battery packs continue to discharge naturally. Therefore, charge them on the day of use, or the day before, to ensure a full charge.
- Attach the terminal cover whenever a battery pack is not in use. Contact with metallic objects may cause a short circuit and damage the battery pack.
- Dirty terminals may cause a poor contact between the battery pack and the camcorder. Wipe the terminals with a soft cloth.
- Since storing a charged battery pack for a long time (about 1 year) can shorten its lifecycle or affect performance, we recommend to discharge the battery pack fully and to store it in a dry place at temperatures no higher than 30 °C. If you do not use the battery pack for long periods, charge and discharge it fully at least once a year. If you have more than one battery pack, perform these precautions at the same time for all battery packs.
- Although the battery pack's operating temperature range is from 0 °C to 40 °C, the optimal range is from 10 °C to 30 °C. At cold temperatures, performance will temporarily decline. Warm it in your pocket before use.
Replace the battery pack if the usable time after full charge diminishes substantially at normal temperatures.

**About the battery terminal cover**
The battery terminal cover has a [ ]-shaped hole. This is useful when you wish to differentiate between charged and uncharged battery packs.

Back side of the battery pack

Terminal cover attached
Charged

Uncharged

**Cassette**
- Rewind tapes after use. A slack or damaged tape may cause video problems and/or audio distortions during playback.
- Return cassettes to the case and store them upright. Rewind tapes from time to time if they are stored for a long time.
- Do not leave the cassette in the camcorder after use.
- Do not use spliced tapes or nonstandard cassettes as they may damage the camcorder.
- Do not use tapes that have been jammed as video heads may become dirty.
- Do not insert anything into the small holes of the cassette, or cover them with cellophane tape.
- Handle cassettes with care. Do not drop or subject them to severe impact as this may damage the cassettes.

With cassettes equipped with a memory function, metal plated terminals may become dirty with use. Clean the terminals with a cotton swab after about 10 times of removing and reinserting the cassette. The memory function is not supported by the camcorder.

**Protecting Tapes from Accidental Erasure**
To protect your recordings from accidental erasure, slide the tab on the cassette to SAVE or ERASE OFF.

**Lithium Button Battery**

**WARNING!**
- The battery used in this device may present a fire or chemical burn hazard if mishandled. Do not recharge, disassemble, heat above 100 °C or incinerate the battery.
- Replace the battery with a CR1616 made by Panasonic, Hitachi Maxell, Sony, Toshiba, Varta or Renata. Use of other batteries may present a risk of fire or explosion.
- The used battery should be returned to the supplier for safe disposal.

- Do not pick up the battery using tweezers or other metal tools as this will cause a short circuit.
- Wipe the battery with a clean dry cloth to ensure proper contact.
- Keep the battery out of the reach of children. If swallowed, seek medical
Do's and Don'ts

assistance immediately. The battery case may break and the battery fluids may cause internal damage.

- Do not disassemble, heat or immerse the battery in water to avoid the risk of explosion.

---

Maintenance/Others

Cleaning the Camcorder

**Camcorder Body**

- Use a soft, dry cloth to clean the camcorder body. Never use chemically treated cloth or volatile solvents such as paint thinner.

**Lens and Viewfinder**

- If the lens surface is dirty, the autofocus may not work properly.
- Remove any dust or dirt particles using a non-aerosol type blower brush.
- Use a clean, soft lens-cleaning cloth to gently wipe the lens or viewfinder. Never use tissue paper.

**LCD Screen**

- Clean the LCD screen using a clean, soft lens-cleaning cloth.
- Condensation may form on the surface of the screen when the temperature changes suddenly. Wipe it with a soft dry cloth.

---

Storage

- If you do not intend to use the camcorder for a long time, store it in a place free of dust, in low humidity, and at temperatures not higher than 30 °C.
Condensation

Moving the camcorder rapidly between hot and cold temperatures may cause condensation (water droplets) to form on its internal surfaces. Stop using the camcorder if condensation is detected. Continued use may damage the camcorder.

Condensation may form in the following cases:

When the camcorder is moved from an air-conditioned room to a warm, humid place

![Image showing a camcorder moving from air-conditioned room to humid place]

When the camcorder is moved from a cold place to a warm room

![Image showing a camcorder moving from cold place to warm room]

When the camcorder is left in a humid room

![Image showing a camcorder left in a humid room]

When a cold room is heated rapidly

![Image showing a camcorder in a cold room being heated]

To avoid condensation

- Do not expose the camcorder to sudden or extreme changes in temperature.
- Remove the cassette, place the camcorder in an airtight plastic bag and let it adjust to temperature changes slowly before removing it from the bag.

When condensation is detected

- The camcorder automatically shuts off, the warning message “CONDENSATION HAS BEEN DETECTED” appears for approx. 4 seconds and [¡] starts flashing.
- If a cassette is loaded, the warning message “REMOVE THE CASSETTE” appears and [ câ ] starts flashing. Remove the cassette immediately and leave the cassette compartment open. Leaving the cassette in the camcorder may damage the tape.
- A cassette cannot be loaded when condensation is detected.

Resuming use

- The precise time required for water droplets to evaporate will vary depending on the location and weather conditions. After the condensation warning stops flashing, wait for 1 more hour before resuming use.
Using the Camcorder Abroad

Power Sources
You can use the compact power adapter to operate the camcorder and to charge battery packs in any country with power supply between 100 and 240 V AC, 50/60 Hz. Consult the Canon Service Center for information on plug adapters for overseas use.

Playback on a TV Screen
You can only play back your recordings on TVs compatible with the PAL system. The PAL system is used in the following countries/areas:
Algeria, Australia, Austria, Bangladesh, Belgium, Brunei, China, Croatia, Czech Republic, Denmark, Finland, Germany, Hong Kong Special Administrative Region, Iceland, India, Indonesia, Iraq, Iran, Ireland, Israel, Italy, Jordan, Kenya, Kuwait, Liberia, Malaysia, Malta, Montenegro, Mozambique, the Netherlands, New Zealand, North Korea, Norway, Oman, Pakistan, Poland, Portugal, Qatar, Romania, Serbia, Sierra Leone, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Swaziland, Sweden, Switzerland, Tanzania, Thailand, Turkey, Uganda, Ukraine, United Arab Emirates, United Kingdom, Yemen, Zambia.
**System Diagram** (Availability differs from area to area)

* The BP-2L5 is not available as a separate optional accessory.
Optional Accessories

Use of genuine Canon accessories is recommended.
This product is designed to achieve excellent performance when used with genuine Canon accessories. Canon shall not be liable for any damage to this product and/or accidents such as fire, etc., caused by the malfunction of non-genuine Canon accessories (e.g., a leakage and/or explosion of a battery pack). Please note that this warranty does not apply to repairs arising out of the malfunction of non-genuine Canon accessories, although you may request such repairs on a chargeable basis.

Battery Packs
When you need extra battery packs, select one of the following models: NB-2L, NB-2LH, BP-2L12, BP-2L14.

CB-2LWE Battery Charger
Use the battery charger for charging the battery packs.

<table>
<thead>
<tr>
<th>Battery Pack</th>
<th>Charging Time*</th>
</tr>
</thead>
<tbody>
<tr>
<td>BP-2L5</td>
<td>70 min.</td>
</tr>
<tr>
<td>NB-2L</td>
<td>80 min.</td>
</tr>
<tr>
<td>NB-2LH</td>
<td>90 min.</td>
</tr>
<tr>
<td>BP-2L12</td>
<td>150 min.</td>
</tr>
<tr>
<td>BP-2L14</td>
<td>170 min.</td>
</tr>
</tbody>
</table>

* Charging time varies according to the charging condition.

CBC-NB2 Car Battery Charger
Use the car battery charger to charge battery packs on the move. The car battery cable plugs into your car’s cigarette lighter and runs off a 12-24 V DC negative ground battery.
Shoulder Strap
You can attach a shoulder strap for more security and portability. Pass the ends through the strap mount and adjust the length of the strap.

WS-20 Wrist Strap
Use this for extra additional protection for active shooting.

SC-2000 Soft Carrying Case
A handy camcorder bag with padded compartments and plenty of space for accessories.

This mark identifies genuine Canon video accessories. When you use Canon video equipment, we recommend Canon-brand accessories or products bearing the same mark.
