	: If the medicine is used for the sea, it should be what suits the standard in the technology that provides by the transportation ministerial ordinance.
METHODS FOR CONTAINMENT	
AND CLEANING UP SMALL QUANTITY	 Remove source of a fire. Remove with a spatula or shovel, or absorb with soil, sand or a cloth. Wipe off remainder with a cloth.
LARGE QUANTITY	 Prevent access by roping off the perimeter around the leak. Prevent the spilling grease from spreading with soil and sand. After draining off to a safety area, collect as much as possible into an empty container.
AT SEA	Prevent dispersion by creating an oil fence. Scoop up or use adsorption mats to soak up. When chemicals are used, these must comply with technological standards as set down in ministry of transport ordinances.
PREVENTION MESURE	
OF SECOND DISASTER	: Inform promptly a related organization to attempt prevention and the expansion prevention of the accident when leaking.: Remove source of a fire and prepare extinguishing media.
7. HANDLING AND STORAGE HANDLING	
TECHNICAL MESURES	 Avoid contact with flame, sparks and heated objects. Do not allow unnecessary dispersion of vapor. Take steps to prevent static electricity, and use conductive work clothes and shoes. Remove completely it in the safety area, if the mechanical equipment are repaired and are processed. Don't eat. Wear protector, if there is possibility of skin contact or eye contact. Avoid inhalation of vapor or mist. Containers must be sealed.
